

Toyota Forklift Parts

Toyota Forklift Parts - In the United States, Toyota Materials Handling inc., or TMHU, has been the best selling lift truck dealer since 1992. This company has been situated out of Irvine, California for well over 40 years, providing a comprehensive line of quality lift trucks. With a distinguished reputation of resilience and reliability, Toyota lift trucks have thrived in the competitive materials handling market. Quality is the foundation of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are manufactured here.

All Toyota's manufacturing plants within Canada and the U.S. comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its devotion to continuous progress and its environmentally friendly systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70% less smog forming emissions than the current centralized EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A. - Leading the Industry

Brett Wood, President of TMHU, associates Toyota's success to its robust commitment to fabricating the best quality lift trucks at the same time as delivering the utmost customer service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's biggest lift truck dealer and is amongst the magazines celebrated World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not many other organizations and no other lift truck manufacturer can match Toyota's history of protecting the natural environment while concurrently advancing the economy. Environmental accountability is a key feature of company decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift vehicles. Yet an added reason they remain a leader within the industry.

Toyota originally released the 8-Series line of lift vehicles in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission values, and California's more environmentally friendly emission standards. The end product is a lift vehicle that produces 70 percent fewer smog forming emissions than the existing Federal standards tolerate.

Also in 2006, Toyota established a partnership with the Arbor Day Foundation, furthering their obligation to the environment. Greater than 57,000 trees have been planted in local parks and national forests damaged by natural causes such as fires, as a product of this relationship. 10,500 seedlings have also been scattered through Toyota Industrial Equipment's network of dealers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift vehicles offer improved durability, visibility, efficiency, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also known as "SAS", helps decrease the possibility of accidents and accidental injuries, in addition to increasing productivity levels while minimizing the likelihood of merchandise and equipment breakage.

System Active Stability senses numerous factors that could lead to lateral volatility and likely lateral overturn. When one of those conditions are detected, SAS instantly engages the Swing Lock Cylinder to stabilize the rear axle. This alters the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to avoid injuries or accidents while adding strength.

SAS was first released to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS continues to be integrated into most of Toyota's internal combustion products. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with required operator education, overturn fatalities across all brands have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's uncompromising principles extend far beyond the machinery itself. The company believes in providing general Operator Safety Training courses to help clients meet and exceed OSHA standard 1910.178. Training courses, videos and a variety of resources, covering a broad scope of matters-from personal safety, to OSHA regulations, to surface and load situations, are accessible through the vendor network.

Ever since the sale of its first lift truck in the U.S. to the manufacture of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained a solid existence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are built in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as production operations and supply centers for equipment and service

parts, with the entire commitment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and consumers of TMHU. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live merchandise demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its originator, Sakichi Toyoda, in 1867, and finally a training center.

The NCC embodies Toyota's commitment to providing top-notch customer service. TMHU's 68 certified Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations throughout the U.S, provide the most comprehensive and inclusive client service and support in the industry. The company's new and Certified Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to guarantee total client satisfaction.
