

Barrel Clamps

Barrel Clamps - Called "Barrel Clamp", this particular hydraulic accessory is used on lift trucks in order to squeeze items that you want to transport utilizing the forklift. Normally, they are utilized so as to paper rolls, barrels, and handle kegs, along with some barrel clamp designs having the ability to rotate the load. For instance, the revolving function allows a lift truck operator to be able to put in a vertically stored paper into the horizontal intake of a printing press.
